Setting up Google News alerts (you will need a Google account):

1. Go to <https://www.google.com/alerts>
2. In the "Create an alert about..." entry box, type in a keyword (e.g., agriculture, cattle, corn, etc.)
3. Click the "Show options" link and select options. I recommend leaving all as is except:
 - a. Set "How often" to *At most once a day* (will only send you email in the morning).
 - b. Set "How many" to *All results*.
4. Click the "Create alert" button.
